# *Advancing the Adoption of AI in Health (4.5 MIL)*

Yiannos Tolias Ph.D.
DG Health and Food Safety (SANTE)
European Commission

# Health Data and AI

Abundance of electronic health data

+

development in AI

=

potential to revolutionize healthcare

3 core proposals:

- EHDS
- AIA
- PLD

Slow and limited uptake of AI in clinical practice

Challenges and accelerators to AI deployment in clinical practice

# Advancing AI in Clinical Practice - Objectives

Set up community of experts with experience in AI implementation

Identify successful and less successful deployment factors

Good Deployment Practices

AI + cancer
AI + remote areas

Interactive Digital Tool :

- Map AI solutions deployed
- Info on AI deployment
- Aid in enhancing collaborations on AI deployment
- Sustainability of the system

Test and evaluate through pilot projects good deployment practices

Workshops and communication activities/educate

Prepare healthcare systems for full-scale application of AI
+
Inform policy makers best way to accelerate safe and effective deployment

# Thank you
