05/12/2023

## Empowering a Human-Centric Industry for the Twin Transitions

Steven Dhondt, Alexios Papacharalampopoulos, Unai Ziarsolo  
- Project BRIDGES 5.0

**COP28** | 30.11 > 12.12.23 // DUBAI, UAE

**ACT NOW**

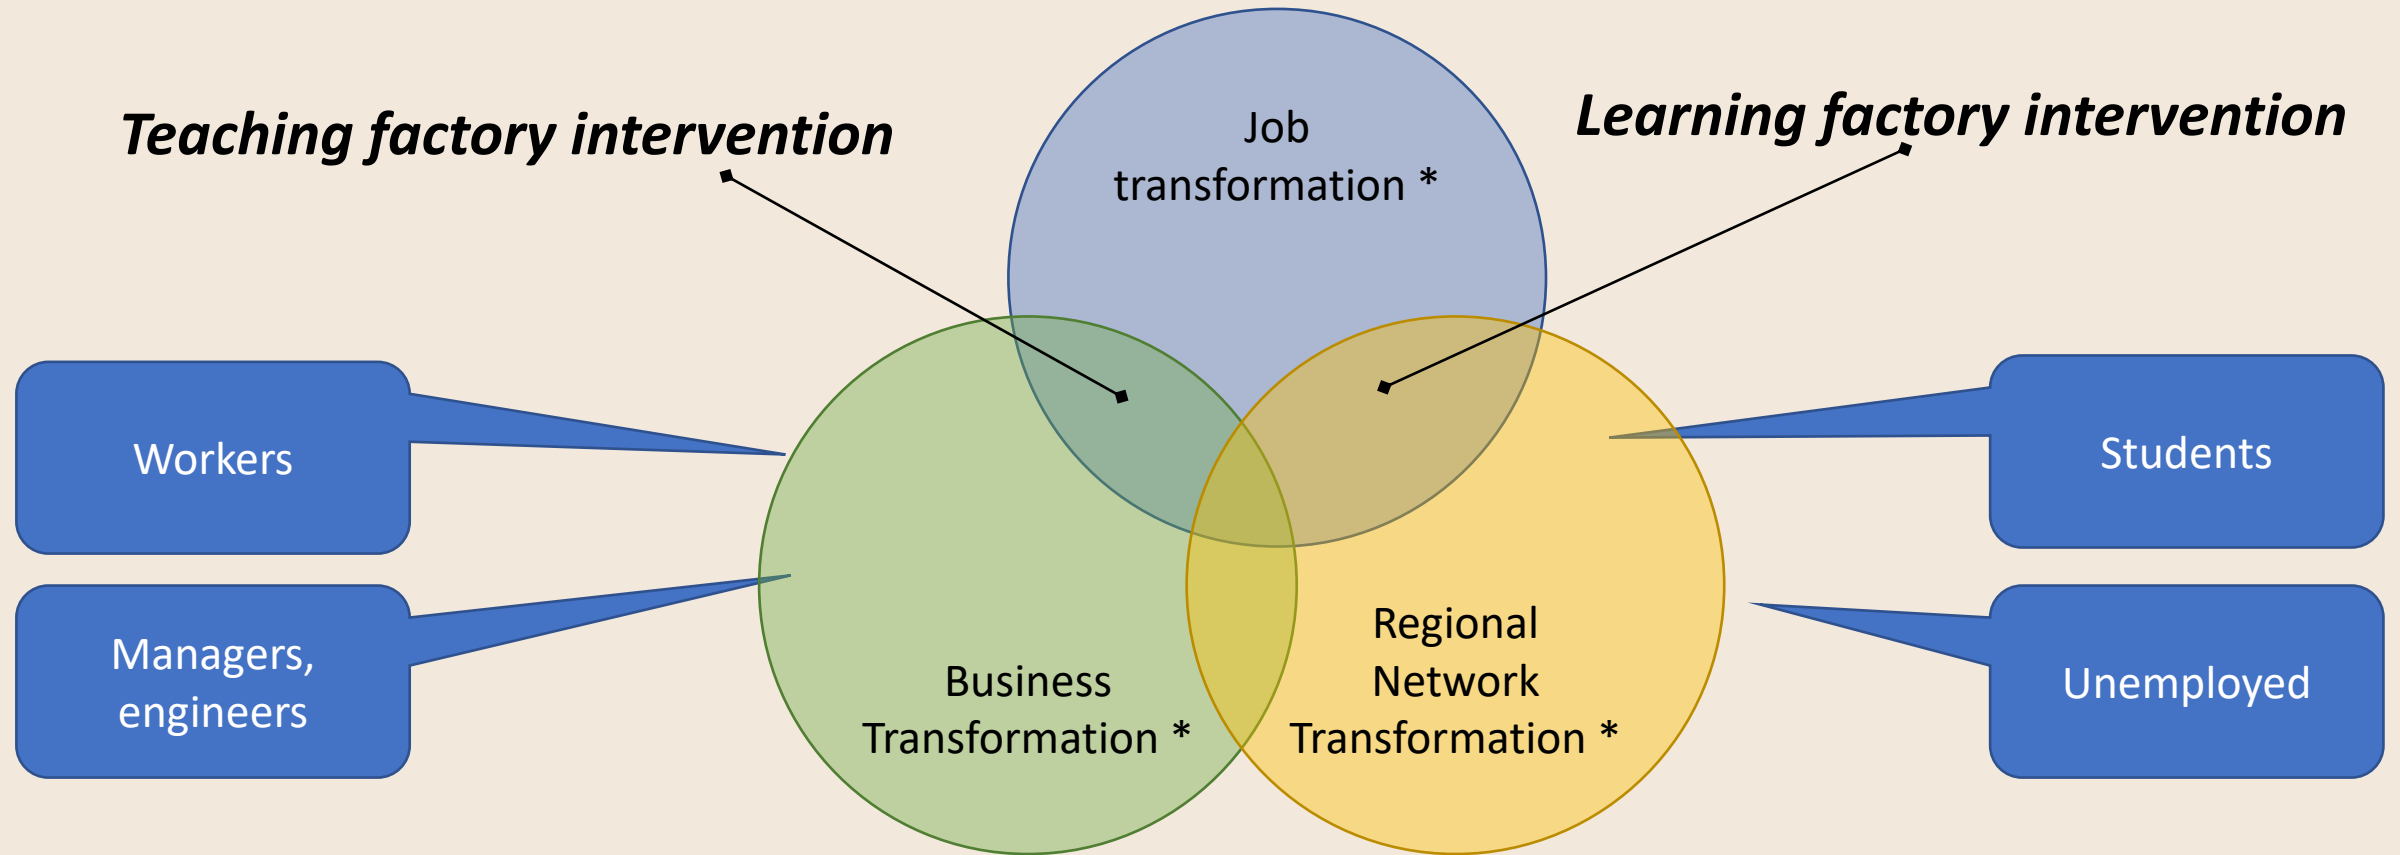

# Achieving the transition, requires changing behaviours and practices

- Companies need to **innovate more**. And innovation has been in dire need.
- More technology is needed. Productive technology only exists if worker and management understand **how to learn from technology**: how to improve technology and organisation.
- The Bridges 5.0 project focuses on specific skill interventions: **problem solving** and learning; and making **better use of technology**. How to create a better learning experience and redirect this learning towards human centricity, sustainability and resilience?

# Achieving the transition, requires changing behaviours and practices of four target groups

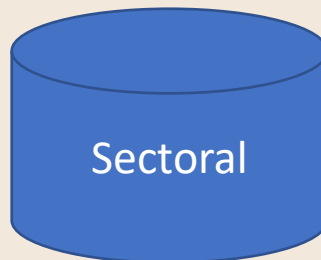

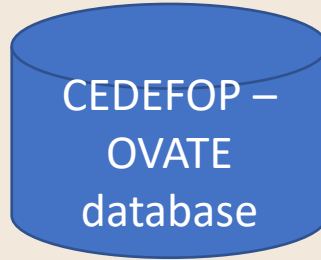

\* With respect to Industry 5.0

# Achieving the transition, requires data

European Centre  
for the  
Development of  
Vocational Training

- LLAM (large language models; chatGPT) to identify company practices.
- Connecting datasets to enrich data.
- Identifying skill sets and training approaches within specific organisational settings.
