

DATA PROTECTION NOTICE FOR JOINT INTER-AGENCY SELECTION OF TEMPORARY AGENTS AND CONTRACT AGENTS

The European Health and Digital Executive Agency ('HaDEA') processes your personal data¹ in line with [Regulation \(EU\) 2018/1725 of the European Parliament and of the Council of 23 October 2018](#)² on the protection of personal data by the European Union's institutions, bodies and agencies and on the free movement of such data.

WHAT IS THE PURPOSE OF THIS PROCESSING ACTIVITY?

The purpose is to receive applications, evaluate and select the best candidates for Temporary Agents and Contract Agents positions available in HaDEA and in the Executive Agencies participating in the joint inter-agency selection.

This processing aims at ensuring compliance with all requirements and proper management of selection procedures conducted by HaDEA when acting as lead agency or when acting as a participating agency in the joint inter-Agency selection. The participating agencies will be clearly identified in the Vacancy Notice. The processing in the context of the joint inter-Agency selections concerns only the selection phase until the establishment of reserve lists.

The reserve lists are kept and managed by the lead Agency and shared as appropriate with the participating Agencies. The subsequent recruitment processes are managed by each agency and subject to own and specific data protection record and notice.

More information on the processing of the personal data for the recruitment phase in HaDEA can be found [here](#).

Besides the above, reserve lists of successful candidates and their personal data are shared among Executive Agencies that do not participate in the joint selection procedure pursuant to the Memorandum of Understanding (MoU) for the sharing of reserve lists ('The Memorandum')³. In line with this Memorandum, the Executive Agencies upload reserve lists onto a common repository form which candidates may be identified and recruited.

WHO IS THE DATA CONTROLLER?

The data controller of the processing operation is the Head of Unit C.3 "Staff, Communication and Support" of HaDEA.

¹ **Personal data** shall mean any information relating to an identified or identifiable natural person ('data subject'). An identifiable natural person is one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person.

² Regulation (EU) 2018/1725 of the European Parliament and of the Council of 23 October 2018 on the protection of natural persons with regard to the processing of personal data by the Union institutions, bodies, offices and agencies and on the free movement of such data, and repealing Regulation (EC) No 45/2001 and Decision No 1247/2002/EC (OJ L295/39 of 21.11.2018).

³ Memorandum of Understanding concerning the modalities and procedures of interaction between the Executive Agencies on the sharing of Reserve lists (Ares(2022)8128318).

The Executive Agencies participating in this type of selection act as joint controllers and are specified in the relevant vacancy notice.

European Commission, Directorate General for Human Resources and Security (DG HR), Unit B.1, processes personal data (as data processor) on behalf of HaDEA as manager of EUCV-Online, the e-Recruitment tool used to process applications (the Privacy statement is available [here](#)). The processor can be reached via HR-MAIL-B1@ec.europa.eu.

In case HaDEA acts as lead agency in a joint inter-agency selection procedure for temporary agents, it may use the following external contractors for the organisation of online written tests and for their invigilation:

- Processor: SoftwareONE BE BV, Esplanade 1, Suite 315, Box 3, B-1020 Brussels.
- Sub-processor: TestReach Ltd, 9-10 NexusUCD, Belfield Office Park, Clonskeagh, Dublin 4, Ireland, D04 V2N9.

WHICH PERSONAL DATA IS COLLECTED?

Personal data allowing to identify the candidate, i.e. surname, first name, date of birth, gender, identification document (ID), nationality;

- Information to allow the practical organisation of preselection and other tests, if any, i.e. address information: street, postcode, town, country, telephone, email;
- Information to verify whether the candidate fulfils the eligibility and selection criteria laid down in the vacancy notice, i.e. nationality, languages, education, employment record, professional experience, military/civil service record, other relevant for the job skills such as knowledge of computer software, references (contact details of referees or performance reports);
- Information about the length of the legal notice period required, periods spent abroad, motivation, declaration of honour as well as where the vacancy notice was found;
- Outcome of EPSO CAST results (for candidates for Contract Agent posts) and supplementary forms of evaluation carried out by the Agency (e.g. written tests);
- Results of the oral tests/interviews, if applicable;
- Identification data of the members of the Selection panels;
- With regard to the invigilation activity on online written tests carried out by TestReach, depending on the type of exam being taken, different information will be collected/stored by TestReach, including:
 - i. Exam Candidate Personal Information – this information is used to identify the candidate, to ensure they take the correct exam and to ensure their specific exam requirements are met. It may include: ID, name, email address, phone, demographic information, special adjustments for the exam (for example, additional time allowed). The candidate will be asked to present approved photographic ID at the beginning of the exam session on the camera and this is reviewed by the TestReach supervisor; they do not need to send their IDs in advance of the exam. When the written scripts are supplied for marking, they will be identified only by a candidate number, not by names or emails, so they will be anonymous for correctors. At the end of the process, each candidate number is matched with the name of the candidate to calculate the final score of the selection process.
 - ii. Computer Information – this information is used to maintain the integrity of the test, to investigate and resolve any issues that may arise (e.g. the Desktop App will check that the camera, microphone, screenshare and internet

connection are all sufficient to take the exam. It could also detect if the computer has two monitors and block candidates from using the second monitor to perform activities outside of the exam. The App would detect any applications running in background on the candidate's computer to prevent the use of screen recording applications) and to help TestReach improve the service offered. It may include: IP address, browser header data (user agent), processes running, RAM & CPU usage statistics, installed drivers, peripherals connected and cookies used.

- iii. Candidate Exam Information – it includes video, audio, remote screenshare and related recording, responses given, score, results data, access and activity data. As the TestReach application has an automatic video buffering, the candidate taking an exam is viewed via video, audio and remote screenshare, and a temporary recording (deleted within 24 hours) is taken of the session. Data collected during the invigilation service carried out by TestReach is stored within AWS (Amazon Web Services) and either: (1) it is written to a database (Mongo DB) – this is typically answers to questions, first name, last name, as a record of the actual exam or (2) it is written to various transaction log files – this is typically transaction information, such as when they logged in, when they logged out, when they navigated to a new question, etc. to ensure robust experience (transactions are logged in various places to ensure the integrity of the data, to allow it to be fully recovered if something happens, for audit-trailing purposes, and to assist with trouble-shooting).

Candidates may spontaneously reveal further types of data not enumerated in the Data Protection Notice. However, HaDEA does not actively request or collect data other than what is listed in the Data Protection Notice.

For reserve lists established before the MoU between the Executive Agencies on the sharing of reserve lists, explicit consent from data subjects will be requested for inclusion in the common repository. The consent will be requested and collected by the data controller via an exchange of emails. In case where the data subject does not consent, or does not reply, their personal data will not be shared with other Executive Agencies.
