

Q&A (08/08/2022)

Reference: **Call for proposals**
Development of non-aversive stunning methods for pigs
SMP-FOOD-2022-PigStunning

Question 5.

**“ Among the mandatory documents it says “3. Activity reports of last year”.
May we assume this is the official ‘annual report’ of an organisation? If not: what does it mean? If it does: some of our partners do not publish annual reports, as they are federal government research institutes. What should they submit instead?**

Yes, annual reports can be considered as activity reports. Activity reports should wrap up the activities of the applicant during the last year (2021). Activity reports of each partners should be submitted. There is no page limitation. Please provide as concise as possible and meaningful information. The report can be submitted in any EU official language. If not in English, a short summary in English would be appropriate.

If such report is not available, please include at the end of the Application Form Part B:

- a weblink where information on the activities of you organisation can be found
OR
- a short summary of your organisation’s activities directly related to the topic of the Call.

Please distinguish activity reports from the information on previous projects. The latter information is to be filled in a specific table available in the Application Form (Part B).
