Digital Europe Programme

Digital Europe Programme is the first EU programme that aims to accelerate the recovery and drive the digital transformation of Europe.

Worth €7.6 billion (in current prices), the Programme is a part of the next long-term EU budget, (the Multiannual Financial Framework), and it covers 2021 to 2027. It will provide funding for projects in five crucial areas: supercomputing, artificial intelligence, cybersecurity, advanced digital skills, and ensuring the wide use of digital technologies across the economy and society.

The Programme is fine-tuned to fill the gap between the research of digital technologies and their deployment, and to bring the results of research to the market - for the benefit of Europe's citizens and businesses, and in particular SMEs. Investments under the Digital Europe programme supports the Union's twin objectives of a green transition and digital transformation and strengthens the Union's resilience and strategic autonomy.
