

Programmes for eradication, control and surveillance of animal diseases and zoonoses submitted for obtaining EU financial contribution

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

Member States seeking an EU financial contribution for national programmes of eradication, control and surveillance shall submit online this document completely filled out by the 31 May of the year preceding its implementation (part 2.1 of Annex I to the Single Market Programme Regulation).

Due to the late adoption of the SMP regulation all programmes will be submitted to be approved technically for 2021 and 2022.

Therefore, this document shall also be filled out and submitted after selection of the options:

This programme is multiannual: "YES"

Request for Union cofinancing from beginning 2021 to end of 2022.

If encountering difficulties:

- concerning the information requested, please contact SANTE-VET-PROG@ec.europa.eu.

- on the technical point of view, please contact SANTE-BI@ec.europa.eu, include in your message a printscreen of the complete window where the problem appears and the version of this pdf:

Instructions to complete the form:

1) You can attach documents (.doc, .xls, .pdf, etc) to complete your report using the button "Add attachments" on the last page of the form.

2) Before submitting this form, please use the button "Verify form"(bottom right of each page). If needed, complete your pdf document as indicated.

3) When you have finished completing this pdf document, save it on your computer.

4) Verify that your internet connection is active and then click on the "Submit notification" button and your pdf document will be sent to our server. A submission number will appear on your document. Save this completed document on your computer for your record.

5) For simplification purposes you are invited to submit multi-annual programmes.

6) You are invited to submit your programmes in English. Document Version: 2020 2.1

Member state : CESKA REPUBLIKA

Disease Transmissible Spongiform Encephalopathies

This program is multi annual :

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

2. Description of the programme

Please give a short description of the programme (max. 32000 chars):

The aim of the programme is to detect any case of TSE and prevent them from entering the food or feed chain thus, eventually, eradicating the diseases and preventing them from causing hazard to public or animal health. The program is lay down in accordance with Regulation (EC) No 999/2001 as amended of the European Parliament and of the Council. The TSE programme covers:

1. sampling and testing of all bovine animals born in Bulgaria, Romania or in third countries which are slaughtered for human consumption and they are over 30 months of age (Annex III, Chapter A, point 2.2. of TSE Regulation);
2. sampling and testing of all fallen stock, sick or injured at the ante mortem inspection and emergency slaughtered bovine animal over 24 months (Annex III, Chapter A, point 2.1. and 3.);
3. sampling and testing of suspect bovine animals only in case the cattle showing nervous symptoms or the positive result of the rapid test;
4. sampling and testing of all fallen stock of ovine and caprine animals over 18 months.

3. Description of the epidemiological situation of the disease

Last year's No of cases	Total No	No of classical cases	No of atypical cases	No of undetermined cases
BSE case	0	0	0	0
Scrapie case (ovine)	0	0	0	0
Scrapie case (caprine)	0	0	0	0
Last case of		date (classical case)	date (atypical case)	date (undetermined case)
BSE		04/05/2009	19/12/2007	25/03/2009
Scrapie (ovine)		31/01/2008	21/04/2017	0
Scrapie (caprine)		0	0	0

Comments (if any)

In the Czech Republic did not confirm a positive case in 2020 (BSE nor TSE).

First occurrence of BSE was reported in the Czech Republic during the year 2001. Since this time a comprehensive national surveillance programme has been adjusted and applied thirty positive cases of BSE have been recorded in the CR to the end of the year 2009. Since 2009 was detected none positive case of BSE. Since 2015, Czech Republic has OIE certificate for BSE status as country with negligible risk for BSE.

The first outbreak of scrapie was detected in 2002. Since that time till end of 2017 we detected totally 62 cases of scrapie - 54 classical scrapie and 8 atypical scrapie. Last case of classical scrapie was in 2008.

4. Measures included in the programme

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

4.1 *Designation of the central authority in charge of supervising and coordinating the departments responsible for implementing the programme*

(max. 32000 chars) :

The central authority competent for supervising and coordinating all activities in veterinary care is the State Veterinary Administration of the Czech Republic (SVA), which performs its powers at the whole territory of the Czech Republic (§ 47, Veterinary Act No 166/1999 Col. of Acts). SVA coordinates the activities of 14th Regional Veterinary Administrations.

The competent authority confirms its commitment to submit a complete report on actions and expenditures in the framework of this programme and to provide additional information when request by the Commission.

4.2 *Description and delimitation of the geographical and administrative areas in which the programme is to be applied*

(max. 32000 chars) :

The program will be applied in whole territory of the Czech Republic.

4.3 *System in place for the registration of holdings*

(max. 32000 chars) :

Holdings in the Czech Republic are registered in the database of farms in accordance to the provisions of the act No. 154/2000, as amended, Breeding Act and corresponding Decree No. 136/2004 laying down details for identification of animals and their registration and registration of holdings and person established by Breeding Act.

4.4 *System in place for the identification of animals*

(max. 32000 chars) :

Bovine, caprine and ovine animals in the Czech are identify individually by ear tags and they are registered in the Central Database. Animals in the Czech Republic are registered in the database in accordance to the provisions of the act No. 154/2000, as amended, Breeding Act and corresponding Decree No. 136/2004 laying down details for identification of animals and their registration and registration of holdings and person established by Breeding Act.

4.5 *Measures in place as regards the notification of the disease*

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

(max. 32000 chars):

Measures in place are to the provisions of the Veterinary Act No. 166/1999, as amended that is in accordance with Regulation (EC) No 999/2001 as amendment. In the case of positive test result all the measures required by the EC legislation will be applied. The compulsory notification of TSE disease is obvious. Positive animal in the herd as well as cohort animals and progeny of the positive animal are killed, tested for BSE and completely destroyed. No parts of the animals can end up at the food or feed chain. Food that may transmit the disease are traced and pulled back from retail.

4.6 Testing

4.6.1 Rapid tests in bovine animals

Targets for year **2021**

	Age (in months) above which animals are tested	Estimated number of animals to be tested	Estimated number of rapid tests, including rapid tests used for confirmation
Healthy slaughtered bovine animals born in Ms listed in Annex to CD2009/719/EC	72	0	0
Risk animals born in MS listed in Annex to CD 2009/719/EC	24	25 000	25 002
Healthy slaughtered bovine animals NOT born in MS listed in Annex to CD 2009/719/EC	30	200	202
Risk animals NOT born in MS listed in Annex to CD 2009/719/EC	24	200	202
Suspect animals (as referred to in Art 12.2 of Regulation (EC) No 999/2001)		4	4

Targets for year **2022**

	Age (in months) above which animals are tested	Estimated number of animals to be tested	Estimated number of rapid tests, including rapid tests used for confirmation
Healthy slaughtered bovine animals born in Ms listed in Annex to CD2009/719/EC	72	0	0
Risk animals born in MS listed in Annex to CD 2009/719/EC	24	25 000	25 002
Healthy slaughtered bovine animals NOT born in MS listed in Annex to CD 2009/719/EC	30	200	202
Risk animals NOT born in MS listed in Annex to CD 2009/719/EC	24	200	202
Suspect animals (as referred to in Art 12.2 of Regulation (EC) No 999/2001)		4	4

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

4.6.2 Rapid tests on small ruminants

The sampling rules applicable for the monitoring of ovine and caprine animals slaughtered or not for human consumption (described below as healthy slaughtered/dead animals) are in compliance with provisions of Annex III, II, 4 of Regulation (EC) No 999/2001, in particular:

- Animals are over 18 months of age or have more than two permanent incisors,
- No over-representation of any group (origin, age, breed, production type, etc),
- Sampling representative of each region and season,
- Multiple sampling in the same flock avoided whenever possible,
- A system is in place to ensure that in successive sampling years, all officially registered holdings with more than 100 animals where TSE cases have never been detected are subject to TSE testing,
- A system is in place to check that animals are not being diverted from sampling (except derogation communicated to the Commission):

yes

no

If no please explain.

4.6.2.1 Rapid tests on ovine animals

Estimated population of adult ewes and ewe lambs put to the ram.

230 000

Targets for year **2021**

	Estimated number of animals to be tested
Healthy slaughtered ovine animals (a)	0
Dead ovine animals (b)	1 500
In the context of measures of control/eradication on holdings affected by TSE as described in Annexes III and VII of the TSE regulation	
Ovine animals from holdings affected by classical scrapie	100
Ovine animals from holdins affected by atypical scrapie	300
Ovine animals from holdings affected by BSE	0
Suspect animals (c)	3

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

Total number of tests	1 903
-----------------------	-------

Targets for year **2022**

	Estimated number of animals to be tested
Healthy slaughtered ovine animals (a)	0
Dead ovine animals (b)	1 500
In the context of measures of control/eradication on holdings affected by TSE as described in Annexes III and VII of the TSE regulation	
Ovine animals from holdings affected by classical scrapie	100
Ovine animals from holdings affected by atypical scrapie	300
Ovine animals from holdings affected by BSE	0
Suspect animals (c)	3
Total number of tests	1 903

(a) Annex III, A, II, 2 of the TSE regulation

(b) Annex III, A, II, 3 of the TSE regulation

(c) Art 12 of the TSE regulation

4.6.2.2 *Rapid tests on caprine animals*

Estimated population of female goats and female kids mated

40 000

Targets for year **2021**

	Estimated number of animals to be tested
Healthy slaughtered caprine animals (a)	0
Dead caprine animals (b)	100
In the context of measures of control/eradication on holdings affected by TSE as described in Annexes III and VII of the TSE regulation	
Caprine animals from holdings affected by classical scrapie	100
Caprine animals from holdings affected by atypical scrapie	150
Caprine animals from holdings affected by BSE	0
Suspect animals (c)	2
Total number of tests	352

Targets for year **2022**

	Estimated number of animals to be tested
--	--

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

Healthy slaughtered caprine animals (a)	0
Dead caprine animals (b)	100
In the context of measures of control/eradication on holdings affected by TSE as described in Annexes III and VII of the TSE regulation	
Caprine animals from holdings affected by classical scrapie	100
Caprine animals from holdings affected by atypical scrapie	150
Caprine animals from holdings affected by BSE	0
Suspect animals (c)	2
Total number of tests	352

(a) Annex III, A, II, 2 of the TSE regulation

(b) Annex III, A, II, 3 of the TSE regulation

(c) Art 12 of the TSE regulation

4.6.3 Confirmatory tests **other than rapid tests** as referred to in Annex X Chapter C of Regulation (EC) No 999/2001

Targets for year **2021**

	Estimated number of tests
Confirmatory tests in Bovine animals	4
Confirmatory tests in Ovine and Caprine animals	5

Targets for year **2022**

	Estimated number of tests
Confirmatory tests in Bovine animals	4
Confirmatory tests in Ovine and Caprine animals	5

4.6.4 Discriminatory tests (Annex X.C point 3.1 (c) and 3.2 (c)(i) of Regulation (EC) No 999(2001)

Targets for year **2021**

	Estimated number of tests
Primary molecular testing on bovine animals	3
Primary molecular testing on ovine and caprine animals	2
Total	5

Targets for year **2022**

	Estimated number of tests
Primary molecular testing on bovine animals	3

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

Primary molecular testing on ovine and caprine animals	2
Total	5

4.6.5 Genotyping of positive and randomly selected animals

Adult sheep population

More than 750,000 animals

Less than or equal to 750,000 animals

Targets for year **2021**

	Estimated number
Genotyping of TSE cases	3
Random genotyping	0

Targets for year **2022**

	Estimated number
Genotyping of TSE cases	3
Random genotyping	0

4.7 Eradication

4.7.1 Measures following confirmation of a TSE case in bovine animals

4.7.1.1 Description

(max. 32000 chars):

The all parts of the body of the positive animal shall be completely destroyed. If the positive animal is found at the slaughterhouse at least carcass immediately preceding and two carcasses immediately following the positive animal are destroyed.

At the farm of positive animals:

- an inquiry shall be carried out to identify all animals at risk

The inquiry must be identifying:

- All other ruminants on the holding of the animal in which the disease confirmed
- Where the disease was confirmed in a female animal, its progeny born within two years prior to, or after, clinical onset of the disease
- All animals of the cohort of the animal in which the disease was confirmed
- The possible origin of the disease
- Other animals on the holding of the animal in which the disease was confirmed or on other holdings, which have may become infected by TSE agent or been exposed to the same feed or contamination sources
- The movement of potentially contaminated feeding stuffs, of other material or any other means of transmission, which may have transmitted TSE agent to or from the holding in question

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

- All animals and products of animal origin that have been identified as being at risk by the inquiry shall be killed, tested for BSE and completely destroyed.

4.7.1.2 Summary table

Targets for year **2021**

	Estimated number
Bovine animals culled and destroyed	100

Targets for year **2022**

	Estimated number
Bovine animals culled and destroyed	100

4.7.2 Measures following confirmation of a TSE case in ovine and caprine animals

4.7.2.1 Description

(max. 32000 chars):

In the case of confirmation of classical scrapie in an ovine or caprine animal we apply the measures in accordance with Annex VII of Regulation (EC) No. 999/2001 (Chapter B, point 2.2.2.):

a) movement of animals from/or to holding is prohibited;

b) either the killing and complete destruction of all animals, embryos and ova; or

c) the killing and complete destruction of all animals, embryos and ova with the exception of:

— breeding rams of the ARR/ARR genotype,

— breeding ewes carrying at least one ARR allele and no VRQ allele, and

— sheep carrying at least one ARR allele which is intended solely for slaughter,

— caprine animals carrying at least one of the following alleles: K222, D146 and S146;

d) investigation of possible source of disease (feed).

e) testing of culled animals in accordance with point 5, part II, Chapter A, Annex III of Regulation (EC) No. 999/2001.

In the case of confirmation of BSE in an ovine or caprine animal, killing and complete destruction of all animals, embryos and ova identified.

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

4.7.2.2 Summary table

Targets for year **2021**

	Estimated number
Ovine and caprine animals culled and destroyed (due to classical scrapie)	150
Ovine and caprine animals compulsory slaughter (due to classical scrapie)	150
Genotyping tests - monitoring and eradication measures	150

Targets for year **2022**

	Estimated number
Ovine and caprine animals culled and destroyed (due to classical scrapie)	150
Ovine and caprine animals compulsory slaughter (due to classical scrapie)	150
Genotyping tests - monitoring and eradication measures	150

4.7.3 Breeding programme for resistance to TSEs in sheep

4.7.3.1 General description

Description of the programme according to the minimum requirements set out in Annex VII, Chapter B of Regulation (EC) No 999/2001

(max. 32000 chars):

The Breeding programme includes conditions in accordance with Chapter C of Annex VII of Regulation (EC) No 999/2001:

2. The minimum requirements for participating flocks shall be the following:

- (a) all animals in the flock that are to be genotyped shall be individually identified using secure means;
- (b) all rams intended for breeding within the flock shall be genotyped before being used for breeding;
- (c) any male animal carrying the VRQ allele shall be slaughtered or castrated, within six months following the determination of its genotype; any such animal shall not leave the holding except for slaughter;
- (d) female animals that are known to carry the VRQ allele shall not leave the holding except for slaughter;
- (e) male animals, including semen donors used for artificial insemination, other than those certified under the breeding programme, shall not be used for breeding within the flock.

Breeding programme is created by Czech breeding association of ovine and caprine animals in cooperation with Ministry of Agriculture. The breeding programme includes farms producing breed animals (high genetic merit). On farm may be introduced only these animals for a breeding:

- (a) male sheep of the risk group I, II and III (if has ARQ alel);
- (b) female sheep of the risk group I, II and III;

The selection of animals for genotyping is performed by Czech breeding association after visual selection of basic breeding standards for each ovine breed. The list of animals intended for genotyping is consequently approved by State Veterinary Administration. The laboratory examination of listed animals

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

is performed by State Veterinary Institute in Jihlava (NRL-TSE).

The genotyp for risk groups: I = ARR/ARR; II = ARR/ARQ, ARR/ARH, ARR/AHQ;
III = AHQ/AHQ, ARH/ARH, ARH/ARQ, AHQ/ARH, AHQ/ARQ, ARQ/ARQ .

4.7.3.2 Summary table

Targets for year **2021**

	Estimated number
Ewes to be genotyped under the framework of a breeding programme referred to in Article 6a of Regulation (EC) No 999/2001	1 500
Rams to be genotyped under the framework of a breeding programme referred to in Article 6a of Regulation (EC) No 999/2001	1 000
Total	2 500

Targets for year **2022**

	Estimated number
Ewes to be genotyped under the framework of a breeding programme referred to in Article 6a of Regulation (EC) No 999/2001	1 500
Rams to be genotyped under the framework of a breeding programme referred to in Article 6a of Regulation (EC) No 999/2001	1 000
Total	2 500

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

5. Costs

5.1 Detailed analysis of the costs

(max. 32000 chars) :

There were about 1 400 000 cattle animals in the Czech Republic at 31. 12. 2020. The overall structure of the cattle population has remained the same during the last few years and no major changes. The number of sheep and goats is approximately the same as in last few yeras. Thus the number of animals subjected to TSE testing in 2021-2022 is not expected to change dramatically from the year 2019 or 2020 unless the EC monitoring programmes will be changed.

An estimate of 25 000 bovines, 3 500 sheep and 850 goats will be tested in 2021. All fallen stock and emergency slaughtered cattle over 24 months of age and all healthy slaughtered cattle over 30 months of age (born in third countries or in Romania and Bulgaria) will be tested, if the current legislation remains unchanged . All fallen stock over 18 months of ovine and caprine animals to be tested in the framework of the national scrapie control programme.

An estimated of 3 000 sheep are planned to be subject to prion protein genotyping in the framework of the breeding programme.

The costs of analysis in 2021 will be propably the same as was in 2019 and 2020.

5.2 Detailed analysis of the cost of the programme

Costs of the planned activities for year :

2021

1. Rapid tests in bovine animals (as referred to in point 4.6.1)

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

Cost related to	<u>Specification</u>	Number of tests	Unitary cost in EUR	Total amount in EUR	Union funding requested	Cofinancing rate	Requested Union contribution in EUR

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

5.3. Financial information

1. Identification of the implementing entities - financial circuits/flows

Identify and describe the entities which will be in charge of implementing the eligible measures planned in this programme which costs will constitute the reimbursement/payment claim to the EU. Describe the financial flows/circuits followed.

Each of the following paragraphs (from a to e) shall be filled out if EU cofinancing is requested for the related measure.

a) Implementing entities - **sampling**: who performs the official sampling? Who pays?
(e.g. authorised private vets perform the sampling and are paid by the regional veterinary services (state budget); sampling equipment is provided by the private laboratory testing the samples which includes the price in the invoice which is paid by the local state veterinary services (state budget))

(max. 32000 chars):

Sampling for TSE examination is realised by official (state) veterinarians. Sampling for genotyping in ovine animals is realised by private veterinarians and they are paid by farmers. So, the State pay the laboratory examination only.

b) Implementing entities - **testing**: who performs the testing of the official samples? Who pays?
(e.g. regional public laboratories perform the testing of official samples and costs related to this testing are entirely paid by the state budget)

(max. 32000 chars):

All TSE samples and samples for genotyping are examined in the three State Veterinary Institutes and the examination is paid by State Veterinary Administration (from state budget).

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

- c) Implementing entities - **compensation**: who performs the compensation? Who pays?
(e.g. compensation is paid by the central level of the state veterinary services,
or compensation is paid by an insurance fund fed by compulsory farmers contribution)

(max. 32000 chars):

Compensation due the disease eradication is paid on central level by Ministry of Agricultural (only from State budget). It is in accordance with § 67 of the Act No. 166/1999 Col. (Veterinary Act).

§67

(1) The keeper shall obtain a compensation of costs and losses incurred in consequence of emergency veterinary measures imposed with a view to eradicate any of the dangerous contagious diseases and diseases communicable from animals to humans listed in Annex 2 to this Act and prevent its spread, and/or under detection of the agent of such contagious disease or disease, on condition that the measures applied immediately include at least the isolation of animals on the holding and the ban on their movement from the time of suspicion of the presence of the contagious disease and following the confirmation of the disease.

(2) The compensation pursuant to Paragraph 1 shall include reimbursements for the following:

- a) expenses for killing or slaughtering infected or suspect animals of receptive species and for safe disposal of their cadavers; in substantiated cases the compensation shall include reimbursements for the safe disposal of their products as well,
- b) a killed or slaughtered animal,
- c) for the cleaning, disinfection, disinsectisation and rodent control of the holding and of its equipment,
- d) ordered vaccinations,
- e) for observance of measures in protection zones and measures for prevention of the spread of a contagious disease,
- f) for the observance of measures during the waiting period established before the contagious disease is declared eliminated and before re-stocking of the holding.

(3) In the case of a contagious disease or disease communicable from animals to humans stated in the Legislation of the European Communities governing the expenses in veterinary field 34b), the following reimbursements shall be provided as well:

- a) for the destruction of contaminated feedingstuffs and contaminated equipment of the holding, which cannot be disinfected in accordance with, Paragraph 2 Letter c),
- b) of the proven losses caused by outage of livestock production during the implementation of emergency veterinary measures imposed and in connection with the measures.

(4) In the case of a dangerous contagious disease affecting bees, the reimbursement shall include the equipment of the beekeeper, related working aids, beehives and their accessories, destroyed or deteriorated because of the emergency veterinary measures ordered.

(5) The compensation referred to in Paragraph 1 shall not be provided whenever the keeper evades his obligations to notify the Regional Veterinary

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

Administration of a suspected presence of the dangerous contagious disease, evades other serious obligations imposed on the keeper by this Act with a view to prevent any occurrence and spread of a dangerous contagious disease and to eradicate such, or evades the protection and eradication measures imposed.

d) Implementing entities - **vaccination (if applicable)** : who provides the vaccine and who performs the vaccination? Who pays the vaccine? Who pays the vaccinator?

(e.g. farmers buy their vaccine to the private vets, send the paid invoices to the local state veterinary services which reimburse the farmers of the full amount and the vaccinator is paid by the regional state veterinary services)

(max. 32000 chars) :

The vaccination against TSE is not available yet.

e) Implementing entities - **other essential measures**: who implements this measure? Who provides the equipment/service? Who pays?

(max. 32000 chars) :

No essential measures are implemented.

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

2 Co-financing rate (see provisions of applicable Work Programme)

The maximum co-financing rate is in general fixed at 50%. However based on provisions of Article 5.2 and 5.3 of the Regulation (EU) No 652/2014, we request that the co-financing rate for the reimbursement of the eligible costs would be increased:

Up to 75% for the measures detailed below

Up to 100% for the measures detailed below

Please explain for which measures and why co-financing rate should be increased to 75% (max 32000 characters)

The gross national income per inhabitant based of the Czech Republic is on the latest Eurostat data less than 90 % of the Union average. Due to this reason the co-financing rate should be increased up to 75% for all measures and examinations included in the programme, i.e. testing of bovine, ovine and

3. Source of funding of eligible measures

All eligible measures for which cofinancing is requested and reimbursement will be claimed are financed by public funds.

yes

no

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

4. Additional measures in exceptional and justified cases

In the "*Guidelines for the Union co-funded veterinary programmes*", it is indicated that in exceptional and duly justified cases, additional necessary measures can be proposed by the Member States in their application.

If you introduced these type of measures in this programme, for each of them, please provide detailed technical justification and also justification of their cost:

Annex III: Programme for the control and eradication of Transmissible Spongiform Encephalopathies

Attachments

IMPORTANT :

- 1) The more files you attach, the longer it takes to upload them .
- 2) This attachment files should have one of the format listed here : **jpg, jpeg, tiff, tif, xls, xlsx, doc, docx, ppt, pptx, bmp, pna, pdf.**
- 3) The total file size of the attached files should not exceed 2 500Kb (+- 2.5 Mb). You will receive a message while attaching when you try to load too much.
- 4) IT CAN TAKE **SEVERAL MINUTES TO UPLOAD** ALL THE ATTACHED FILES. Don't interrupt the uploading by closing the pdf and wait until you have received a Submission Number!
- 5) Only use letters from a-z and numbers from 1-10 in the attachment names, otherwise the submission of the data will not work.
