## CONNECTING EUROPE FACILITY - Telecom Grants 2014-2020

### Safer Internet

The **Safer Internet** DSI provides access to child-safety related content and services delivered via interoperable national Safer Internet Centres (SICs). These SICs provide the following services<sup>1</sup>:

1. Awareness Centres provide access to information and educational resources regarding opportunities and risks that children and youth are facing online, building on digital repositories, from which specific awareness toolkits, campaigns and services are developed.
2. Helplines provide information, advice and assistance on how to deal with harmful online content, contact or conduct.
3. Hotlines offer a way of anonymously reporting child sexual abuse material and other illegal content.

The SICs share tools, resources and good practices through the CEF funded **Better Internet for Kids (BIK) Core Service Platform**<sup>2</sup>. The BIK platform is also accessible for the public to find information, guidance and resources.

The first Safer Internet Programme was launched in 1999 and since 2015 the support to the programme is provided under the Connecting Europe Facility (CEF). Over the years, funded activities have covered awareness raising, fighting illegal content, filtering and content labelling, involving the civil society in child online safety issues and creating a solid database of information related to the use of new technologies by young people.

**114 agreements** have been signed for the Safer Internet DSI under the 2014 - 2020 calls<sup>3</sup>. A total of **€59.61 million** of CEF Telecom funding has been earmarked for 27 Member States, two EEA countries and one third country, corresponding to a total cost of €121.1 million.
